

## Access Agreement

All expenses related to the performance of the aquifer test will be borne by the applicant (owner/developer) for Block \_\_\_\_, Lot(s)\_\_\_\_. However, access to neighboring wells must be provided by the owners of those properties. All reasonable precautions will be observed by the applicant, the applicant's hydrogeologist, and the well driller to avoid damage to any adjacent residential property including both the well itself and its surroundings.

The owner of the neighboring well, who signs below, agrees to provide access to a commonly used tap for the collection of water samples prior to and after testing for bacteria analysis. After the initial water sample is collected, the well will be opened to permit access to measure water levels and the well will remain unsealed during the testing process which will be a maximum of 72 hours. A dip tube may be installed within your well to facilitate the measurement of water levels.

All equipment placed in your well will be cleaned to minimize the potential introduction of bacteria. However to ensure that no bacteria are accidentally introduced into your well during the testing process, chlorine will be added to your well at the conclusion of the testing procedures. If you would prefer that chlorine not be added to your well, please check the box below the signature line.

With your signature and submittal of this form, you request participation in the monitoring of water levels during the aquifer test on the Lot identified as Lot \_\_\_\_, in Block \_\_\_\_, in accordance with the Kingwood Township Well Ordinance, Section 153-29, and that you have read and accept the requirements of this form.

Property Owner

\_\_\_\_\_  
Date

Please **do not add** chlorine to my well at the conclusion of testing. I understand and will accept responsibility that bacteria may have been accidentally introduced into my well.

Actual daily use factor. Monitor must be installed 72 hours prior to test and remain for 72 hours after test.
